

MasterPlan LIVE from Circular Software is a secure service to place searchable high quality previews from the inside pages of your books onto your own and your partner's websites. From there you have complete control to select which spreads can be viewed and easy links for social sharing.

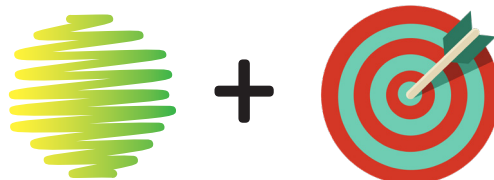

Search, comment & share publications online

MasterPlan LIVE adds searching and secure social media sharing of any spread of any book to any website.

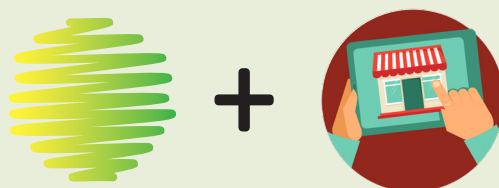

MasterPlan converts any print or marketing PDFs, EPUBs or InDesign files into a set of searchable online previews for adding into your websites.

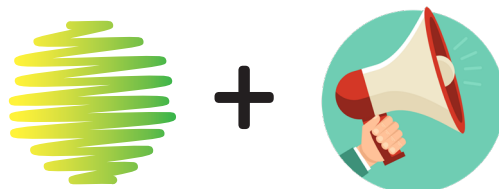

For Sales - online sales kits for quick searching across all titles and instant retina quality previews as links to present your prospective customers.

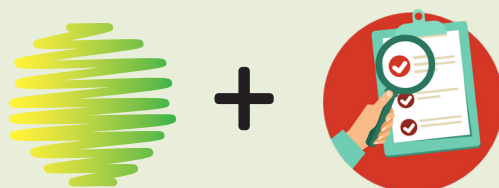

For Marketing - share retina quality previews on your website and choose any spreads from inside your books to post on various social media channels.

For Publicity - time limited and secure sharing of chosen spreads or even entire books to influencers and media contacts in advance of publication.

Web Developers - get full access to an API for bulk ingestion and data driven websites. Connect MasterPlan as a front end to your in-house systems.
