

MasterPlan WORK from Circular Software is a simple yet powerful software service that connects everyone involved in creating your illustrated publications to a searchable, retina quality, up-to-date view of every spread of every title as they evolve.

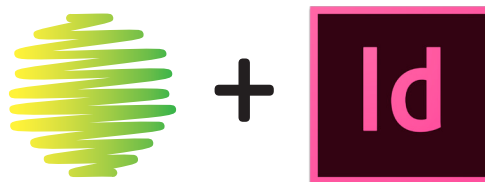

Search, comment & share publications online

MasterPlan WORK lets creative teams connect, plan, preview, comment and track their InDesign work in progress.

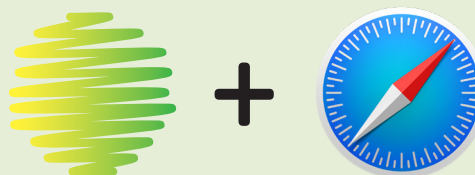

MasterPlan Online is a live browser based overview of every page of every job that your creatives are working on right now.

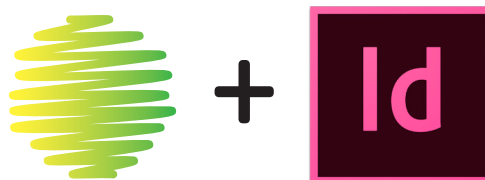

Users of the MasterPlan Desktop App automatically update the MasterPlan Online pages whilst they work in InDesign simply by saving their files. Files are NOT shared.

MasterPlan Online web users can see live updates of retina quality spread previews, add comments and change statuses.

MasterPlan Desktop App users can pull the online comments back into their InDesign pages and share modifications instantly.

Everyone is kept in the loop in real time (if they wish) with messaging app integration.
